DETAILED ACTION

Amendment Entry

1. The preliminary amendment filed 2/10/06 is acknowledged. Claims 1-12, 24-31, and 33-34 have been modified. Claims 13-22 have been canceled. Currently claims 1-12 and 23-34 are pending and under consideration.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

To have a general inventive concept under PCT rule 13.1, the inventions need to be linked by a special technical feature. The special technical feature that appears to link claims 1-12 and 23-34 is the utility of polypeptides like Apo C-III in stroke. However, the reference of Kasturi et al. (Stroke, Vol.23, No.9, 1992, pages 1257-1264) discloses this special technical feature. Kasturi et al. disclose that the presence of known RFLPs in the apoprotein A-I-C-III gene cluster were restricted with SacI and PstI and assessed for stroke risk in an American population. See abstract. Therefore the technical feature recited in claims 1-12 and 23-34 is not a contribution over the prior art. Accordingly the groups set forth below are not so linked as to form a single general concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 1641

- A. Group I, claim(s) 1-12 are drawn to a method of diagnosing stroke via a polypeptide such as Apo C-III; classified in class 435, subclass 7.21, for example. (A 1st first method employing a special technical feature).
- B. Group II, claim(s) 23-31 are drawn to an assay device for diagnosing stroke; classified in class 435, subclass 283.1, for example. (A 1st device employing the special technical feature).
- C. Group III, claim(s) 32-34 are drawn to kits comprising reagents for analyzing stroke; classified in class 422, subclass 61, for example. (A 1st product comprising a special technical feature).

3. The inventions listed as Groups A through C do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Under PCT rules Applicant is entitled to an examination of one of the combination groupings: (1) a product, a method of using said product and a method of producing said product. The instant claims are directed to inventions which are not a contribution over the prior art. Accordingly, Applicant must select one for further prosecution.

Art Unit: 1641

4. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group A through C are not totally inclusive, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

Art Unit: 1641

The Group 1641 Fax number is (571) 273-8300, which is able to receive transmissions 24 hours/day, 7 days/week.
